

# Custom PLC Based Control System

Providing PLC solutions for Pharmaceutical and Biotechnology Applications.

## PLC Based Control System

- Custom PLC Solutions for all Pharmaceutical and Biotechnology applications.
- Allen Bradley PLC Based Controller provides open architecture for ease of validation and/or customization.
- PLC customized to any new or retrofit application.
- Fully scalable systems from low cost Micrologix through SLC500 series to Control Logix PLC's.
- Optional Software Package with Ethernet interface to provide remote monitoring, data trending and storage capability. Stored Data is easily converted to an Excel Spreadsheet.

## Typical Applications

- Bioreactors
- Media and Buffer Preparation Systems
- Clean In Place Systems
- USP Purified Water Systems
- WFI Systems
- Temperature Bio Kill Systems
- Chemical Bio Kill Systems
- Neutralization Systems
- Filtration Systems
